Chair of the Organizing Committee of the 2025 AFRAN Congress, that will be held on April, 15-18, 2025 in Tunis, Tunisia.

Candidate’s Statement

Pr Mohamed Mongi BACHA

As a candidate for the position of ISN Africa Regional Board Deputy Chair, I am committed **to building a stronger, more unified nephrology community across Africa.**

My goal is **to increase ISN membership** by highlighting the advantages of joining, including free membership opportunities for several countries. This will ensure greater African representation within ISN, foster cross-border collaboration, and expand access to ISN’s valuable resources for education, innovation, and international cooperation.

If elected, I will work **to spotlight and support leading nephrology centers in Africa**, helping them become ISN-recognized centers of excellence. These centers will provide advanced training in clinical nephrology, haemodialysis, peritoneal dialysis, renal pathology, and transplantation, enhancing expertise across the continent.

I will focus on **empowering young nephrologists** by facilitating access to high quality training, promoting participation in ISN programs, and ensuring their voices are heard in shaping the future of nephrology in Africa.

Moreover, I will **advocate for hosting the World Congress of Nephrology (WCN) once again in Africa**, to highlight our achievements and potential.

I also aim **to create a comprehensive directory of nephrology centers in Africa** to promote regional cooperation and capacity-building, particularly in key areas like transplantation.

With your support, I am committed to **advancing kidney care and health equity throughout Africa.**
